

Abhishek Kumar

Software Engineer · Backend & Full Stack · Distributed System

Email : abhishekstark1707@gmail.com | +91-8678021510 | GitHub | LinkedIn | LeetCode

Summary

B.Tech Information Technology graduate with hands-on experience in software development, application design, REST API development, testing, debugging, and troubleshooting. Experienced with Java, Spring Boot, JavaScript, SQL/NoSQL databases, Git/GitHub, and Agile development practices. Built backend and full-stack applications involving authentication, payment workflows, database operations, API validation, and third-party integrations. Strong foundation in OOP, Data Structures Algorithms, software design, SDLC, and technical problem-solving, with 250+ coding problems solved.

Education

Arya College of Engineering and IT

Bachelor of Technology (B.Tech) in Information Technology

Sep 2022 – May 2026

CGPA: 8.11

Work Experience

Pedestal Techno World Pvt. Ltd.

Web Development Intern

May 2025 – Jun 2025

Jaipur, India

HTML · CSS · JavaScript · REST APIs · Git · GitHub

- Developed and tested software components using **HTML, CSS, and JavaScript**, adhering to coding standards and quality measures; independently delivered all assigned features within sprint timelines while supporting the wider team on implementation, integration, and troubleshooting.
- Integrated **3 third-party REST APIs** enabling dynamic, data-driven web features; applied critical thinking to navigate ambiguous technical requirements, proposing and implementing suitable solutions with minimal guidance.
- Collaborated in a team using **Git, GitHub**; participated in sprint planning and code reviews, maintained technical documentation, and communicated findings clearly to technical and non-technical teammates.

Projects

Food Frenzy | Java, Spring Boot, Spring Security, JPA/Hibernate, PostgreSQL

May 2026

- Developed a backend-driven food ordering platform using Java, Spring Boot, RESTful APIs, Spring Data JPA/Hibernate, and PostgreSQL following a clean layered architecture.
- Implemented secure role-based authentication and authorization using Spring Security and Google OAuth 2.0, with cart and order management, CRUD operations, and API validation.
- Designed and documented REST APIs using Swagger/OpenAPI 3 while maintaining separation of concerns and maintainable backend components.

Movie Ticket Booking Platform | React.js, Node.js, Express.js, MongoDB, Stripe API, JWT, RBAC

Nov 2025

- Designed and built a high-availability full-stack application; implemented a comprehensive test strategy (unit, functional, integration) achieving **100% coverage** of critical payment flows with low failures.
- Diagnosed and resolved a complex **concurrency bug** — independently identified the root cause, implemented a fix, and validated it across **1,000+ simulated transactions**.

AI-Powered News Aggregator | React.js, Node.js, MongoDB, Firebase SSO, Gemini AI, Socket.io, Zod

Jul 2025

- Integrated **Gemini AI** for automated content summarization, reducing reading time by **~70%** for end users; independently learned and applied new AI frameworks.
- Built a scalable distributed backend with **Zod** schema validation to reject malformed API requests before database processing, following coding standards throughout for maintainable, high-quality delivery.

Technical Skills

Languages: Java, JavaScript, SQL

Backend & Frameworks: Spring Boot, JPA/Hibernate, Node.js, Express.js, FastAPI, REST APIs, Microservices

Development & Collaboration: Git, GitHub, CI/CD, Code Reviews, Technical Documentation, Vercel

Databases: MySQL, PostgreSQL, MongoDB

Software Engineering: OOP, Data Structures & Algorithms, Software Design, SDLC, Agile, Authentication, Authorization, API Validation, Debugging, Troubleshooting

Certifications

- Advanced Software Engineering Job Simulation** — Forage (Walmart Global Tech): software development lifecycle, coding standards, scalable architecture, code reviews, and engineering best practices.
- Wells Fargo Software Engineering Virtual Experience** — Forage (Mar 2026): backend development, data modelling, ORM, and version control in an enterprise context.
- Java (Basic)** - HackerRank.

Achievements & Leadership

- Solved **250+** coding problems on LeetCode, demonstrating continuous skill development and strong problem-solving across data structures, algorithms, and system design.
- Co-Leader, Esports Club**, Arya College of Engineering — led team strategy, planning, and communication across competing priorities, demonstrating collaborative leadership.
